## Listing of Claims:

Claims 1-29 (Canceled)

30. (Previously presented) An implantable synthetic stomach for implanting inside the

stomach of a patient comprising:

a storage forming an antrum for storing food therein, said storage has an up-stream

and a down-stream opening, a first tube connected to the storage at its up-stream opening,

said first tube being insertable in a sealed manner into the esophagus of the patient and a

second tube connected to the storage at its down-stream opening, said second tube being

connectable in a sealed manner to a small intestine loop within the patient, wherein said

storage is bulging relative to the first and second tube; and

wherein said storage is designed as a rigid receptacle having more rigidity than the

first tube and the second tube.

31. (Canceled)

32. (Previously presented) An implantable synthetic stomach according to claim 30, further

comprising fixing means provided at free ends of said first and second tube, respectively for

fixing the tubes to the respective parts of organs of the patient.

33. (Previously presented) An implantable synthetic stomach according to claim 30, wherein

said storage comprises an additional aperture forming an outlet into the stomach of the

patient.

34. (Previously presented) An implantable synthetic stomach according to claim 33, wherein

said aperture includes means for changing its size.

35. (Previously presented) An implantable synthetic stomach according to claim 30, further

comprising means for adjusting the size of an additional aperture of the storage leading into

the stomach of the patient such that about 10% of the food entering the storage comes into

contact with the stomach and the duodenum.
